Bye Bye Plastic Bags Jogja

17 SDG's

TAPI...

KENAPA?

Plastik sekali pakai tidak terurai secara alami, membutuhkan waktu berabad-abad untuk terurai sepenuhnya.

Selama proses tersebut, plastik mencemari tanah, air, dan seluruh makhluk hidup.

**Sampah plastik juga dapat memasuki rantai
makanan kita bersama **mikroplastik**.**

THE PLASTIC YOU USE ONCE TORTURES THE OCEANS FOREVER

*From the Arctic to
Antarctica, ocean
debris is killing
marine wildlife—
but we still have
the power to stop
plastic pollution.*

This albatross chick died after
ingesting secondary plastic trash
with plastic trash on Midway
Island, where scientists estimate
one percent of the birds have
some plastic in their bodies.

a Plague of Plastics

- Plastik berasal dari bahan bakar fosil.
- Proses produksinya menyumbang emisi karbon besar.
 - 1 botol plastik = jejak karbon 82,8 gram CO₂.

CAN WE GO ZERO WASTE?

5

PRINCIPLES OF ZERO WASTE

Refuse

refuse to use
single use item

Reduce

stop of using
single use item

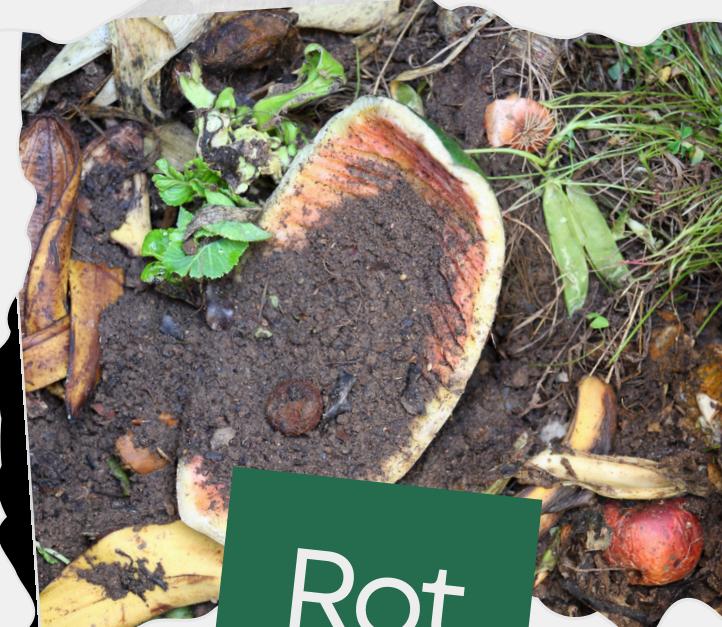

Reuse

find new ways to use
items instead of
discarding them

Recycle

recycle items you
can't reuse to create
new materials.

Rot

compost food
scraps to enrich
soil and reduce
landfill waste.

Use cloth shopping bags

START FROM HOME

Recycle organic waste into compost

Recycle non-reusable items
